

# BMW CSL 3.5Liter

This Mod is Part of a Series for Long-distance Races like IMSA, WORLD Championship, DRM or 24H of Le Mans.

Other Cars will follow, like De Tomaso Pantera GTS, Ford Capri RS, Chevrolet Corvette.

These Mod is My Art of Conversion from GTL to rFactor, and required the original GTL Game!

I converted all Cars by myself! No Cars or Parts are used from any other Mod!

Similarities are by pure chance and unmeant.

I put a lot of my Heart, many many Hours of hard Work and many many of the best Paintings for these Cars, from the Community around the World, and the famous Work from SIMBIN in one Peace.

These Mod come with his own Showroom, (usable in all other Mod's if wished) derived from the rF-Track Essington, and other ISI Tracks.

A Full-Standalone Pace Car is also included (usable in all other Mod's if wished).

**There are no Traction control or ABS available!!!**

Thanks to the Painters for there wonderful Work and the Permission to use there Skins.

Please don't use these Paintings or Parts from these Mod, in other Mod's without Permission from the Owner!

If You are interest to drive the included Offline Championship, you need this Tracks:

For IMSA 1975:

Special Thanks to **Saecco** for using Parts of his Pit crew, for the Crew in the Showroom.  
And thanks to me, to use some more Parts of Details from ISI Tracks, and are crazy enough to do  
this Time-serving Work.

The most Thanks but go to **SIMBIN**.  
And now have Fun.
